

# FPV Week 1: Implications, Assertions and Conditions

- Successful participation ( $\geq 70\%$ ) in quizzes and programming tasks will lead to a bonus of 0.3 in the final exam, provided that you passed the exam.
- Programming homework and quizzes are to be submitted individually.
- Discussing solutions before the end of the week is considered plagiarism.
- Plagiarism will not be tolerated and will (at the very least) lead to exclusion from the bonus system

# Material

The screenshot shows a GitHub repository page for the repository `Funky-Punky / FPV_SoSe22_T2_Do-10-12`, which is public. The repository is on the `main` branch, with 1 branch and 0 tags. The commit history shows three commits: `.gitignore` (Initial commit, 10 hours ago), `README.md` (Update README.md, 10 hours ago), and `README.md` (Update README.md, 10 hours ago). The repository has 0 stars, 1 watching, and 0 forks. The repository description is "Materialien für Jonas' Tutorium in FVP SoSe22". The repository also has a Zulip-Stream link: [https://zulip.in.tum.de/#narrow/stream/1034-FPV\\_T\\_2](https://zulip.in.tum.de/#narrow/stream/1034-FPV_T_2). The repository is licensed under the MIT license. The repository also has a README file, which is displayed in the main content area. The README file contains the title `FPV_SoSe22_T2_Do-10-12` and the description "Materialien für Jonas' Tutorium in FVP SoSe22". The repository also has a Releases section, which shows "No releases published" and a link to "Create a new release". The repository also has a Packages section, which shows "No packages published" and a link to "Publish your first package".

# Week 01 Tutorial 01 Recap: Implications

1.  $x = 1 \implies 0 < x$
2.  $x < 6 \implies x = 3$
3.  $x > 0 \implies x \geq 0$
4.  $x = -2 \implies x < -1 \vee x > 1$
5.  $x = 0 \vee x = 7 \implies 4 \neq x$
6.  $x = 1 \implies x \leq 3 \wedge y > 0$
7.  $x < 8 \wedge y = x \implies y \neq 12$
8.  $x = 1 \vee y = 1 \implies x > 0$
9.  $x \neq 5 \implies \text{false}$
10.  $\text{true} \implies x \neq y$
11.  $\text{false} \implies x = 1$
12.  $x \geq 1 \implies 2x + 3 = 5$
13.  $A \wedge x = y \implies A$
14.  $B \implies A \vee B$
15.  $A \implies (B \implies A)$
16.  $(A \implies B) \implies A$

## Week 01 Tutorial 02 Assertions

1. Which of the following assertions hold at point **A**?

- a)  $i \geq 0$
- b)  $x = 0$
- c)  $i \leq 10 \wedge x \neq 0$
- d) *true*
- e)  $i = 0$
- f)  $x = i$

## Week 01 Tutorial 02 Assertions

2. Which of the following assertions hold at point  $B$ ?

- a)  $x = 0 \wedge i = 0$
- b)  $x = i$
- c)  $i < x$
- d)  $0 \leq i \leq 10$
- e)  $i \geq 0 \wedge x \geq 0$
- f)  $n = 1 \implies x = i$

## Week 01 Tutorial 02 Assertions

3. Which of the following assertions hold at point  $C$ ?

- a)  $i \geq 0$
- b)  $i = 10$
- c)  $i > 0$
- d)  $x \neq n$
- e)  $x = 10n$
- f)  $x = i * n \wedge i = 10$

## Week 01 Tutorial 03 The Strong and the Weak

3. Which of the following assertions hold at point  $C$ ?

- a)  $i \geq 0$
- b)  $i = 10$
- c)  $i > 0$
- d)  $x \neq n$
- e)  $x = 10n$
- f)  $x = i * n \wedge i = 10$

1. When annotating the control flow graph, can you say that one of the given assertions is "better" than the others?
2. Can you arrange the given assertions in a meaningful order?
3. How can you define a *stronger than* relation formally?
4. How do *true* and *false* fit in and what is their meaning as an assertion?
5. What are the strongest assertions that still hold at  $A$ ,  $B$  and  $C$ ?
